

## Robert Schlag

Robert received his bachelor's degree from UC Berkeley in immunology and bacteriology and his master's degree in Toxicology from the University of San Francisco. He received his REHS while working at Contra Costa County. Subsequently, he worked for the California Department of Health Services for 28 years in various leadership capacities including: Chief of the Exposure Assessment Research Section, Chief of the Childhood Lead Poisoning Prevention Branch, Chief of the Cancer Research and Surveillance Program, and Assistant Center Director for Environmental Health. Over his career, he has authored a number of scientific publications and has served as principal investigator on multiple grants from CDC, NCI, EPA, ATSDR, and HUD. Mr. Schlag currently serves on several advisory committees, including the American Cancer Society, the Lung Association, and the UC Davis Health and Safety Center. He currently serves as the Chief of the Food, Drug, and Radiation Safety Division.
